A four cylinder 1,995 cc four-cylinder, petrol-engined, six-speed manual gearbox motor car. Showing 71,744 miles (Not warranted correct, but looks plausible from the MOT history held at the DVLA). Registration No EO61 EVW, first registered on 23/12/2011, currently SORN'd, MOT'd expires on 23/04/2027. The V5 is present. Fitted with a "BMW Professional" Radio/C.D. player, four electric windows, electrically-adjusted mirrors, etc., Started immediately and drove normally around the sale-yard at the time of lotting. A solid feeling, nugget of a motor car in an attractive paint-work and leather trim combination. NOTE: The DVLA vehicle MOT history website indicates that this vehicle is subject to a safety recall by BMW to carry out certain remedial works, apparently at no cost to the owner. It is possible that this work may already have been undertaken, but this fact should be checked with the manufacturers' dealership. An attractive, apparently low mileage vehicle with 9 months' MOT.

The hands are blued and the watch glass is loose, but present. The beautifully engineered movement marked "EXCLUSIV", which was running at the time of cataloguing, has two tiny hammers, presumed to strike the hours and quarter-hours on two ring gongs. The watch is 2" diameter and in total, including the movement, etc., weighs some 99 gms. (Appears to require a service, the lever-set mechanism not working correctly, the two gongs only operating intermittently, although the stop-watch facility operates, including the fly-back, albeit that the hand is not returning to the correct 12 o'clock position).

All of the hands are blued, but the watch glass is absent. The nicely engineered movement exquisitely strikes the hours and quarter-hours on two ring-gongs, each quarter-hour being denoted by a double-strike. This timepiece was running at the time of cataloguing, including the stop-watch facility, but the fly-back sweep seconds hand returns to a fraction after the 12 o'clock position, it would probably benefit from a service. Note: a small amount of gold has peeled from the crown - visible in the images. The watch is 2" diameter and in total, including the movement, etc., weighs some 115 gms.
